M.R.F. Supervisor's Monthly Report July 5th, 2019

The month of June was a very busy one. It was difficult for Carey and I to try and keep up. We were unable to keep afloat. The jobs done include:

Accepting incoming garbage, recyclable materials, demolition, and everything else under the sun from the residents and businesses as well.

We crushed several tons of glass and hauled it to the storage area.

Bagged up all the recyclables to be stored in the bins for baling.

We made several bales of cardboard, paper, aluminum, and paper.

Weighed and separated the electronics and placed into gaylords for shipping.

I hauled electronics to Duluth for pick up from Green Lights recycling.

Carey hauled several loads of garbage and demolition to Waste Management in Ashland.

We smashed the demo boxes and ran the nail sweep in the demo area.

Sorted through several gallons of old paint.

Checked fluids levels on the equipment.

Answered numerous phone calls.

Additional info:

Due to the fact, that we have not received any applicants for our third person:

I think that the only way for us to keep up with the amount of incoming material without any help is to cut off Sundays for the rest of this summer. Sunday is by far the slowest day in the summer months. This would give us one less day of accepting material and an extra day to process. Please take this into consideration or Carey and I may not survive the summer.

Respectfully Submitted,

Ted Pallas Supervisor M.R.F.
