M.R.F. Supervisor's Monthly Report September 5, 2019

September could not get here fast enough for me. We barely managed to keep our heads above water. Things have been very busy at the M.R.F. Hopefully business will slow down some now. The things done by the M.R.F. crew for August include:

Accepting an assortment of incoming trash from the residents, businesses, and all others who have come to visit our Island.

Dealing with all contractors and various amounts of demolition debris.

Hauling all glass containers into the shop to run through the crusher. Dump full barrels and haul to storage bin, until used by the road crew for base.

Bagging all recyclables to be stored until baled.

Baling all plastic, tin, aluminum, paper, and cardboard.

Packed up microwave ovens and hauled them to the mainland for processing.

Sorting electronics and placing into gaylords for shipping.

Hauled all electronics to Duluth for pick up from Green Lights Recycling

Carey hauled garbage and demolition to Ashland when he was able.

Leveled demo and metal boxes to prepare for hauling.

Sorted all incoming haz-mat and placed in proper containers for shipping.

I also answered numerous phone calls.

Additional info:

1. Carey is easing back into light duty, which includes driving loads to Waste Management. Thanks a ton to Kristopher for filling in on days when Marty could not. Thanks also to Marty for helping to stay afloat with the baling. I really do appreciate it very much.

Respectfully submitted,
Ted Pallas
Supervisor, M.R.F.
