Calls  
10/10 ferry line contacted 911 when they spotted a large plume of smoke coming from the interior of the island. We responded to a large brush pile being burnt. The fire was being attended to by person with a burning permit....another reminder that as a courtesy to the town and fire department please give a heads up when igniting large fires. We appreciate the head's up as the ferry line will always notify us when they spot fires...false alarm calls usually cost the town upwards of \$300

10/21 down powerline on old fort road. We barricaded the dangerous line and notified excell.

10/26 call from 911 asking to to provide assistance for a heated up ceiling fan. After determining it was not dangerous we returned to the hall.
