M.R.F. Supervisor's Monthly Report January 8th, 2020.

The M.R.F. has finally slowed down for a bit. The jobs done for the past month by the staff include:

Accepting incoming solid waste from the residents, businesses, and contractors on the island.

Collecting paper, cardboard, plastics #1 & #2, tin, and aluminum storing in proper places until baled.

Weighing and sorting electronics. Packing in gaylords until time for shipping to Green Lights Recycling.

Hauling several tons of glass into crushing area to be processed.

Switching demo and solid waste boxes and hauling to Waste Management.

Sorting out the haz-mat for shipping in the spring with NWRPC.

Servicing the equipment

Moving lots of snow

Packing down the demo boxes

Dumping glass barrels and hauling to the storage areas for future use.

Cleaning the shop

Answering numerous phone calls

Additional info:

1. We have all the boxes in place for the winter. I believe there's probably at least 6 or more weeks before any boxes will need to be moved. I have had a rough last month, but I will do my best to come up with a plan for moving forward.

Respectfully Submitted,

Ted Pallas Supervisor M.R.F.
