

M.R.F. Supervisor's Monthly Report March 5th, 2020

It has been very difficult to come to work these past weeks without seeing Carey here. He will be greatly missed for a very long time.

The M.R.F. has been picking up already. Tasks done by me and Marty for the month of February include:

Accepting incoming solid waste and demo from all who enter the facility. Public, contractors, and strangers alike.

Hauling numerous barrels of glass into the shop to be crushed. Dumping the barrels and hauling to the storage area.

Sorting, bagging, and baling recyclable plastics.

Baling cardboard, paper, tin, and aluminum.

Weighing and packing several pounds of electronics into gaylords. To be hauled to Duluth for pick-up from Green Lights Recycling.

Moving lots of snow.

Leveling the demo boxes in preparation for hauling to waste management.

Working on the equipment from time to time.

Answering numerous phone calls.

Additional info:

1. The old compactor is out of commission. I have hopes that the problem is the directional switch for the ram. I believe that I have one in stock and can repair it myself. It will have to wait until the snow melts so I can get at the controls.
2. We have just started our last empty construction box. I expect it to fill up quickly. I know the load restrictions are on Monday the 9th, so we will see what happens in the near future.

Respectfully Submitted,

Ted Pallas Supervisor M.R.F.
