Subject: Fire chiefs report May 2020

Throughout the month of may our main accomplishments were getting our new/used fleet of apparatus into and up to operational standards. Some issues were bigger than other but big water apparatus has almost got the fleet in tip top shape. It will be reassuring knowing there wont be a whole lot to do except drive them to the new fire hall when the time comes.

We trained with the Paul Wilharm dry hydrant/pond with success. Very clean water and lots of it at our disposal. We exercised all the equipment at the sanitary plant to help out the sanitary district and practice valuable water shuttle and pumping skills.

Eloise Andreas has created placards for the pumper operations of our 2 engines that are very user friendly.

Let's keep being safe.
