

Ref	Sub-ref	Q.	topic code	Comment
7	g	V 5:	1	No brainer!
16	0		1	We have gotten to be a disposable society for everything from vehicles, clothes, food & appliances.
37	e		1	Add "Because we care" campaign to Chamber of Commerce; mention all efforts to save the environment.
38	e		1	Would be willing to do almost anything to recycle as much as we can.
39	b		1	I am in full support of the recycling program. People need to be aware of their waste production.
42	h	IV.	1	Track record. Why not start with the easy fixes first?
43	b		1	Full island sustainability should be the vision. Recycling, food and energy.
44	b	I.6.	1	Reduce, reuse, recycle. The island could enhance its "brand" in this manner. ... We're in support of the Island being a beacon of progressive approaches to waste management specifically, and sustainability more generally.
50	b	VIII.4.	1	sustainability more generally.
59	n	IX.	1	Gives the Town some money.
59	o	X.	1	I recycle!
61	e	II.2.	1	That's what a MRF is for
61	h	V.	1	Less people = less waste=super low impact.
61	n		1	It would benefit all if there was more emphasis on the footprint every person has on Madeline Island through media messaging.
68	a		1	I take pride my kids grew up recycling but I have family in Duluth that doesn't,
71	b		1	I've always been proud of how MRF handles all waste, and, with the belief that communities should keep their garbage.
78	f		1	I fully support the initiative of a "green Island"
100	b		1	I am not sure this project is a priority. Or if the town does increase the budget at the MRF (a need) they should simultaneously take that money from other departments which are over - budgeted and a want (library, Parks) with COVID-19 and a recession or depression on our doorstep, the Town should not be increasing spending at this time. Taxpayers are going to find it difficult enough to pay their taxes without even more proposed spending. Enough is enough.
106	f		1	find it difficult enough to pay their taxes without even more proposed spending. Enough is enough.
116	b		1	We only have one island, we need to take care of it. Charge or do whatever we need to preserve the island.
138	f		1	Waste & recycling will cost more in the future.
143	f	X:	1	My community only recycles 1-2 plastics & I don't trust the MRF
149	d		1	Keep Madeline "Green" as possible
166	b		1	Keep Mad Island as beautiful as it is. No garbage anywhere on the island is so awesome.
212	c		1	recycled products (the way we do it now) saves me money & help the future.
227	b		1	I'm for any process that reuse & reduce garbage & recyclables. Please keep in mind that we are summer residents and understand that our needs and views might not reflect that of the year round community? However we are very willing to help keep Madeline as green as possible.
235	c		1	very willing to help keep Madeline as green as possible.
245	0		1	We can set an excellent example.
253	b		1	The island is so beautiful and we need to do whatever we can to keep it that way.
259	e		1	Yes-I am all for this?
268	b		1	We really appreciate the MRF on Madeline Island.
275	b		1	Keep it green. Decrease our impact on this wonderful island! I believe with our limited population, which is pretty progressive with obvious benefits to being more self sufficient and sustainable, that the MRF and any islandwide composting programs have the opportunity to be so kick ass!
289	a		1	composting programs have the opportunity to be so kick ass!
292	i		1	Tough to balance making Mad Island more expensive and being a good env. partner.
293	b	II.	1	Develop programs and then support. My husband is totally not interested in recycling and would answer this questionnaire completely differently. I do all of the recycling work most of the unillegible)
297	d		1	gladly but I wish there would be ways for him to "see the light".
66	d	VIII 4:	2	Not to the exclusion of mandatory charges
297	b	VIII.4.	2	Should be mandatory.
2	a	I 3:	3	I currently do I currently use my compost
5	a	I 4:	3	

leaves, grass clippings

6	a	I 4:	3	
6	c		3	I would like to see a composting site for leaves, grass, food waste - create soil for a place that has poor soil (check out the Duluth site - they sell soil for \$30 a yard)
7	a	I 4:	3	I compost my own waste
8	a	I 3:	3	already do
9	a	I 3:	3	already do
10	a	I 4:	3	We can do this on our own land.
15	b	I 3:	3	I strongly disagree
15	c	I 4:	3	I strongly disagree
21	b		3	An island wide compost site for food scraps would be great & will cut down on so much overall trash. The bags decompose quickly so that is a drawback and tourists likely would have them with them.
25	c	I 3:	3	I think too high
25	d	I 4:	3	no
29	e		3	I think the cost of learning and implementing a compost system should come out of our taxes.
31	n		3	Before proposing composting - actual figures of food waste needed.
37	d		3	Community composting - I've been giving it to Marty.
42	a	I.3.	3	We do already.
42	b	I.6.	3	I think 4#is crazy has it been tested here?
42	c		3	Maybe ask if already composting.
49	a	I.3.	3	concern with bears and other wildlife being attracted to it.
52	b	I.3.	3	Already do.
52	c	I.4.	3	If no additional taxes, fees.
53	b		3	Don't demand composting.
55	a		3	I.3. At my own home.
57	c		3	I.3. I don't want to attract bears - I can't unless there is a drop off place.
59	b	I.3.	3	I already do.
59	c	I.4	3	No.
61	b	I.3.	3	Already do at home.
70	d		3	I could have used more information about ... recycling of compostables - which i'm in favor of, but do myself in my yard. I am curious that compotsing was not included in this questionnaire. Northland College has an operation that returns energy of food waste back to soil. We should be pursuing that practice.
71	d		3	
72	a		3	There is little excuse for islanders not composting their food waste. no protein or meat to attract bears. besides composing the crows will eat most everything else.
124	b		3	strongly believe in a community compost location
141	0	I 4:	3	Especially if we can use the compost too
141	d		3	use compost from community gardens.
142	a	I 4:	3	Community garden composts
143	b	VI 1:	3	I will provide compost space/town can't do it This Island needs a legit composting program as the average person's garbage is 23% compostable. This will require a little infrastructure (spending) but will quickly see a ROI in fewer dumpster/mainland trips. I will help if it seems realistic a plan. Ted will not help in this, he doesn't care.
143	g		3	
161	c	II.3.	3	Can't - too many bears in our neck of the woods.
192	b		3	Sell kitchen scrap bins with tops and explain how to compost!
198	e		3	I don't compost because of worries about bears but would take stuff to compost elsewhere.
200	c		3	We would compost on the island, but we don't want bears coming in.
205	a	I 4:	3	Bears ??
238	a	I 4:	3	should be individual
279	0		3	Very concerned about increasing the rodent population on the island due to composting issues.

282	a	I.3.	3	Already have/own.
285	0		3	I would like to learn more about composting & maybe the dump could sell home composting kits.
292	a	I.4.	3	Would compost on our own.
292	g		3	Happy to compost.
293	a	I.2.	3	To some degree.
296	a	I.3.	3	We do already.
296	b	I.4.	3	Easier to do at home.
297	a	I.4.	3	So long as convenient location.
299	a		3	4# of food waste a day? That seems high.
299	b		3	Composting: would it be fenced in? Does it attract scavengers, varmints? How do you keep that down?
7	h	VII 1:	4	for customers to bring?
7	i	VII 4:	4	it recycles very little actually
10	d	VII 1:	4	Risk of spreading germs is high w/COVID-19
15	a	I 2:	4	I strongly agree
20	0		4	Comingling of recyclables would be most beneficial (single stream)
23	0		4	Pay at the point of sale for removal from island - tires, grills, appliances, construction materials (homeowners) etc.
25	a	I 1:	4	Yes
25	b	I 2:	4	TRUE
26	0		4	Why do questions on single source for recycling?
40	a	X.	4	Do not know rules re: cleanliness. List please. Fill the barrel - dump into compactor. Recycle symbols/number too small to read.
42	k	VII.1.	4	Up to them.
44	a	I.2.	4	We very much don't mind.
45	b	VII.2/3.	4	Best efforts but I'm human.
48	d		4	Stop the use of non-recyclable glasses and utensils and dishes by bars and restaurants. The best solution is to impose and collect an advance disposal fee at the time the product is manufactured, so the cost of disposal is built in to the cost of the product. This approach is best applied on a national or state basis. I suggest La Pointe impose a disposal fee on all products purchased or brought onto Madeline Island. Use the funds collected to handle waste disposal and recycling. Admittedly difficult to implement. The intent is to charge at the point of consumption and charge higher disposal costs for products difficult to recycle.
51	a		4	disposal costs for products difficult to recycle.
52	a	I.2.	4	Plastic and metal.
52	g	VII.3.	4	Usually.
54	b	II.1.	4	How to properly recycle.
56	f		4	The only thing that could improve would be not having to separate plastics, but if need be we will still recycle.
57	b		4	I.2. I don't mind at all!
59	a	I.2.	4	I don't mind.
59	j	VII.1.	4	Who gives out bags now?
59	k	VII.4.	4	Maybe what is cost effective. Saves me money.
61	a	I.2.	4	.
61	l	IX. 8.	4	To save cost of disposal at MRF and compost for garden.
65	a	X:	4	Mostly the lack of recycling option here make it difficult to recycle everything esp plastics. A ban on all single use plastics + styrofoam is not out landish there are affordable options, and many of them, to use. No plastic bags, plastic cups (unless compostable & disposed of so they can be composted commercially), plastic straws, plastic to go containers/utensils and no Styrofoam
65	b		4	Including #3 - #7!
66	b	VII 4:	4	Including #3 - #7!
66	h	X:	4	Except the ill-advised change to not accept #3-#7
69	c		4	Recycling should be a budget priority for the town. It's really important to us summer residents.
69	f		4	Could the town encourage stores to offer bulk saee options, so called no work groceries, see thetaremarket.com
70	f		4	Maybe there could be ... free refills of water bottles at local businesses?
74	0		4	Hate the current recycling sorting as it is current. Have to search for tiny numbers on plastic waster in the hard recycling area. Too much sorting required and most plastic goes in the trash bins eventually anyway.

76	0		4	The numbers for the type of recycle materials is too small to read on the containers. Producers of these materials need to make the numbers easier to read.
78	g		4	let's start with banning plastic bags.
83	b		4	I wish #5 was recyclable!
85	c		4	Recycling doesn't accept all numbers - expand.
91	b		4	I am 98% behind recycling except for recycling the very light plastics, I think 5's? It seems that it might take more energy (thus pollution) to transport it then R3 this very light plastics. So for me, if we cut recycling to the essentials, cardboard, paper, metal, glass & plastic milk jugs & only other plastic that makes sense. Separating recycle items is not even mandatory anymore. you want to make this easier, do what every other community does and mix it all together. I have not located another community that requires separating items.
94	0		4	we need to maximize our MRF revenues for all recyclables & help to make it pay for itself.
102	b		4	I helped start the program.
105	a	IX:	4	Economics should decide what does or doesn't get recycled.
122	0		4	We recycle glass, cans, plastic but what about recycling paper & cardboard? And all eating establishments use paper cups and straws.
123	a		4	Reduce plastic sales on island.
141	e		4	Hope we do not lose recycling streams
142	b	VIII 2:	4	1-2's
143	c	VII 3:	4	Maybe
143	d	VIII 2:	4	We also can not abandon #3-6 recycling as there are tons of #5 containers being used.
143	h		4	i enjoy recycling
151	b		4	I would like to encourage restaurants and stores that have "to-go" or disposable containers to work together to order compostable/recyclable containers or charge a surcharge for the to-go disposable products. Check options at worldcentric.org for compostable options.
155	b		4	although China has ceased accepting single stream or dirty recycling, another developing country will soon be taking their place. Do not make us start at square on once this market reveals itself.
156	0		4	Why no paper recycle?
157	d		4	Not in all cases.
160	a	VII.1.	4	Ban plastic bags.
161	a	V.	4	We recycle all we can.
161	b		4	... food scraps are not possible [to recycle] because of bears. We could haul food scraps in if a compost yard was available.
161	d		4	It would be much easier to not have to sort recyclables. No sort like we have in most larger cities.
165	0		4	Educate people that clean recycling is important otherwise everything ends up in the landfill. Better throw out dirty questionable trash then to have recyclables that are dirty and get land filled.
171	b		4	Since property [rental] is a major business on MI, it will be critical to have the input & cooperation of the management companies (The Inn etal) Rental contracts should be rewritten to include recycling costs & strategies. All [rental] units should be equipped with statements supporting recycling as well s bins/containers for all recyclables & instructions for renters.
172	0		4	If having a separate recycle bins work - i am all for it.
181	c		4	I always recycle plastic bags for my use.
188	a	I 6:	4	Organize a recycling meeting to discuss ways to R/R/R
192	c		4	yes
193	b	IX:	4	I don't believe in recycling, It costs more money & energy than we get out of it.
197	b		4	I am psychotic about the need to recycle and/or not use plastics. All for what every can be done.
198	d		4	don't mind at all
203	a	I 2:	4	But also as a business owner I cant' control what people do with their trash - which is hard. Then I have to pay for it.
203	b	III 5:	4	ban plastic bags on island
209	d		4	all packaging should be paper, cardboard, glass or metal!
225	b		4	
232	a		4	Home owners should have on hand a list of recclables and how to prepare them it - wash all containers, keep/toss/recycle caps. What's accepted, and what's not.
259	a	I 3:	4	doing already
262	a	VII 1:	4	Use paper

274	a		4	Recycling has been important to me for decades. [...] Would be a part of volunteering help but [...]
276	a	VII 1:	4	always forget the bag
282	c	II.3.	4	Stop buying non-recyclable plastic.
283	b	X.1.	4	that I can within the MRF limits.
290	a		4	It would be nice to have more plastics being recycled at the facility. A lot of plastic gets thrown away.
291	0		4	Make more plastics recyclable at facility.
292	h		4	Happy to separate.
2	b	VIII 7:	5	0
3	0	VIII 7:	5	1
5	b	VIII 7:	5	2
6	b	VIII 7:	5	0
9	e	VIII 7:	5	1
10	g	VIII 7:	5	3
10	i		5	We fully support efforts to increase recycling and to get junk cars, trucks & buses off the island! We also realize many island residents live on very limited incomes, so programs to remove junk vehicles should not impose financial hardship on those residents.
15	g	VIII:	5	Call Rawhide, see if they would participate in car removal.
19	a	VIII 1:	5	Build in fee for this.
22	0		5	Removal of junk cars should be owners responsibility.
24	a	VIII 7:	5	2
25	p		5	Clean sweeps are done in Ashland, why not here?
31	k		5	VIII.6-11. Not a solid waste issue.
35	d	VIII.9.	5	Should be the property owner. I think Mr. Scott Grabarek and Diane Marie could get some of the eyesores off the island so visitors and prospective buyers don't think this is all a big junkyard and/or
35	e	VIII.11.	5	dump site. along with Mr. Wangenstein.
35	f		5	Get the car crusher back to the Island and start recycling vehicles.
38	c	VIII.6.	5	We don't have junk cars, but way too many on the island.
45	d	VIII.6.	5	I don't have a junk car but favor one to clean up.
45	e	VIII.8.	5	I will donate \$100 to get rid of. 3)Please create incentives for owners of junk cars to dispose of them or create penalties for noncompliance. Madeline Island is not a third world country but parts of it
45	h		5	look the part due to lack of personal responsibility.
48	a		5	VIII. The Town needs to remove the junk cars sitting at the airport. These cars are polluting ground water by leaking gas and oils. This is a violation of EPA regulations.
48	b		5	The Town needs to set standards that will not allow junk cars on the Island - "Island wide."
49	d	VIII.6.	5	Is an eyesore that should be taken care of but I'm not going to pay for it as I don't have any and if I did it would be up to me to remove it and I would.
51	b		5	With vehicles, the town must charge the last title holder, not the taxpayers at large.
60	c	VIII.6.	5	Big time - a big problem, Town needs to address this and find a solution.
60	e		5	By the way, the oil waste spot is an environmental disaster and even a worse disgrace to this town than any other one thing (which there are many).
62	a	VIII 7:	5	1
63	h	VIII:	5	this is a lot of questions on cars
66	e	VIII 7:	5	0
66	f	VIII 8:	5	waster reduction /disposal The 2 questions about car disposal seem to suggest a piece meal way to ??? this - what we have done in the past sees to work well. Where a crusher comes in and
67	c		5	hauls away a bulk of vehicles.
70	a	VIII 6:	5	Wont charities take junk cars for free elsewhere?
70	b		5	I could have used more information about unique challenges like junk cars
71	a	VIII 7:	5	2

77	0	VIII 7:	5	1
78	c	VIII 9:	5	[assess] those that caused problem
80	0	VIII 7:	5	0
81	a	VIII 7:	5	0
82	b	VIII 7:	5	3
83	a	VIII 7:	5	1
85	b		5	What is the issue with junk cars? This is a property owner issue the police can deal with not my problem.
86	0	VIII 7:	5	0
87	a	VIII 7:	5	1
88	0	VIII 7:	5	1
95	0	VIII 7:	5	0
96	0	VIII 7:	5	0
97	0	VIII 7:	5	0
99	a	VIII 7:	5	1
100	0	VIII 7:	5	0
100	d		5	Appliances & furniture should not be collected, that is the responsibility of the owner to remove or dispose of these items.
104	b	VIII 6:	5	People paid to get the vehicles here, why should they not pay to remove?
108	a	VIII 7:	5	2

282	f	VIII.8	5		Proceeds to MRF.
282	g		5		Concerned with vegetable oil waste where animals get in and scrape soil all around them. Rancid? Make for unhealthy animals.
282	h		5		Oil disposal tank - cement structure full of water mixed with oil and leaking into our environment and lake.
283	e		5		The used automotive oil and restaurant fryer oil containers/containment need updating - they both overflow and/or leak.
287	a	VIII. 7:	5	4	
288	0	VIII 7:	5	0	
303	0		5		Most junk car dealers haul the cars for free and scrap themselves to make money. Rawhide Ranch a nonprofit troubled youth program accepts vehicles of all kinds to provide learning opportunities etc. Might not come to island to pick up but might in
304	0		5		Bayfield. They accept all cars any age or condition running or not and offer free transport 1-920-785-6655/
15	d	I 5:	6		I strongly agree
15	e	I 6:	6		I agree
21	a		6		Move the exchange back into the large building.
25	e	I 5:	6		yes

25	f	I 6:	6	yes
31	d		6	I.5. Needs to be moved, better hours.
31	j		6	VII. 5/6. Make easier to use.
32	a	VII.6.	6	Good enough. The large building for the exchange was great, but it needed a designated paid responsible person in charge - full or part time?? The great "small garage Exchange" worker was wonderful, but the facility just wasn't up to the potential that it had been for the Island community & for Red Cliff.
33	b		6	VII.6. Because it causes more workers more expense.
34	e		6	Whatever - I think Tommy is already doing this!
35	b	VII.6.	6	The "exchange" is just a free thrift store. It has become a place where bums and cheapskates drop off crap to avoid paying for disposal. If it is any good save it for St. John's Church Bazaar.
36	f		6	VII.6. Shop downtown... Start a shop downtown for things in Exchange.
37	a		6	For other things too.
38	b	VIII.3.	6	longer hours for exchange
40	b		6	
42	m	VII.6.	6	Old location was much better. Area too congested; hours are terrible.
50	a	VIII.3.	6	If builders find it helpful.
54	a	I.5.	6	In the winter also. We need a person friendly and willing to work with everyone!! I have tried bringing my usable items to the Exchange - only to be talked down to and charged extra! ...
56	a	I.5.	6	We have stopped using the exchange because of the current personnel and the disrespect we have received.
56	b	VII.6.	6	This would include a person to work the Exchange. There are people who have seen items placed at the exchange but could not make use of them because MRF workers want the items or are saving them for others. If this is the case, then those items should be removed at the time of drop off.
56	c		6	
56	d		6	It is really too bad that the exchange has been down graded and that people have violated the exchange by dropping off their trash withing the building.
59	d	I.5.	6	No.
59	e	I.6.	6	I already do.
59	l	VII.5.	6	No.
59	m	VII.6.	6	We pay at the end of the year to get ride for th stuff that sits all summer at the Exchange. Let someone start a private business doing this on their own property.
61	c	I.5.	6	Lead in question - I donate to Encore.
61	d	I.6.	6	Have done so throughout my life before living on Madeline Island.
61	k	VII.6.	6	That costs money for management and disposing at end of year.
63	b	I 5:	6	better hours - better location
63	i		6	Exchange too limited
63	j		6	Exchange worker shouldn't be allowed to say what should be allowed.
63	k		6	Entire place need re-organizing better flow and for user understanding.
63	l		6	Maybe ask what you are looking to change [exchange?]
68	b		6	first thing is to clean, open exchange building and
69	b	VIII 3:	6	Let's use the one on the mainland, we're too small to support our own.
72	b		6	I bring everything else to ABC Thrift Shop .
89	o		6	We love the exchange!
91	c		6	I think an organized construction reuse exchange is a great idea. i still very much like the household exchange.
92	a		6	Hoping here is a viable way to over see the exchange or move it to a different location, run the way the run goodwill etc, it is pretty much an eye sore, broken glass etc.
103	o		6	It is a good idea to have a person (Gwen) at the exchange whenever it is open. in 2019 the open hours for exchange were very suitable.
105	b		6	Please keep the exchange open
106	c	VII 6:	6	Bring it to the church bazaar.

107	c		6	why is the exchange never open ?
113	b		6	Please consider a boat recycle program. ... [clean-up program for old] boats would be great I have always believed in the principles of reduce,reuse, then recycle and the more we can educate and initiate change among local businesses and individuals alike,
124	a		6	the better it will be for the sustainability of La Pointe.
126	b	VIII 3:	6	Not sure what an exchange is and why you limit it to construction materials.
127	a		6	The exchange is a great program. We participate & support it. Can it use more things from St. John's rummage sale?
132	a		6	Make a list of what you can recycle.
140	0		6	I'm highly in favor an exchange for construction materials.
141	c		6	<b>Staff the exchange &amp; post opening times.</b>
151	a		6	I love the exchange!! The questions about the exchange are a bit challenging to answer as I would like to see the exchange move to support other organizations currently doing this work, so
153	b		6	that this is not a part of the program.
153	c		6	[... However,] construction materials may make sense [as an item to be handle on "exchange" basis at MRF].
154	a		6	VII 6: Only if it can be managed properly - The current situation regarding the exchange is not workable.
157	b		6	Exchange is a great idea - why so small now?
173	0		6	Expand the exchange. Keep it open.
182	b		6	Somehow . . . get the exchange ramped up/kept up. And, yes, add one for construction materials.
182	c		6	And, yes, add one [exchange] for construction materials.
209	a	VIII 3:	6	all items
229	b		6	I feel that the exchange need to have a person on site to assure that the exchange is used appropriately. Same for building materials and appliances.
240	0	VIII 3:	6	adding, not limiting the exchange to construction
259	b	I 6:	6	most of my cabin was built using recycled bldg. materials.
260	b	VI 5:	6	As long as its orderly & maintained
276	b	VII 5:	6	very
276	c	VII 6:	6	but then you get people dropping junk off
276	d	VIII 3:	6	but still want the other exchange
290	c		6	The Exchange is important. Please keep available and open (more).
292	d	VII.5/6.	6	If it is being used. As a summer person we tend to drop off more than use.
294	0	VII.5.	6	If we have the room.
295	b		6	We love the Exchange (a.k.a. "the Mall"! Thank you for keeping it available.
296	c	I.5.	6	Or the bazaar.
297	c	VIII.6.	6	Bust would support.
11	0		7	Visitors arriving by ferry boat should be assessed \$1.00 each for island maintenance. Local residents would be exempt as they pay taxes for this maintenance.
46	0	VI.1.	7	Not sure what "alternative" means; on island? Off island?
47	0		7	As I have strived to explain to "those who make decisions" yes a tourist surcharge on ferry is discrimination, but if we raise the ferry standard rates and then give a bigger discount rates when purchased with a ferry "discount card there will be no legal issues and that rate hike can be applied to infrastructure to handle tourism.
52	d	IV.	7	Finance from savings elsewhere - it's called "zero based budgeting".
52	o		7	Spend less, do more. I also think the Town should develop better negotiating skills when dealing with the Ferry Line. Maybe for the sweet leasing dock deal they get the Town doesn't then
55	i		7	pay top dollar for every service the ferry provides (i.e., hauling off trash).
57	d		7	VI.1. My property taxes are sky high - should pay for this.
61	f	III.	7	Another leading questions; prompts the respondent to answer in a particular way. I do not feel inconvenienced. I pay for the use of the MRF as charged which is determined by MRF employees, not the Town.
87	b		7	Manage recycle program with higher costs to consumer and + large increase in wages for staff.
87	c		7	Can't run this program will with 2-3 people participating may-oct

				revisit hauling our own vs hiring outside hauling company. ... Please investigate the operational costs of hauling our own garbage and recyclables versus hiring an outside firm (eagle waste or waste management) to do it. I do not think we are saving anything by doing it in-house. Vehicle insurance, fuel, maintenance, CDL driver
106	a	IV 2:	7	all adds up, plus purchasing our own roll-off boxes \$\$\$\$.
106	d		7	Any changes to the MRF comes down to cost.
114	b		7	I am against any policy that discourage or burden visitors to the island.
124	c		7	[strongly believe in] itemized costs for types of disposal.
125	e		7	<b>3. Recycling generates income, Show us the true cost of our recycle program.</b>
143	a	III, IV, V:	7	not through tax increase. streamline spending.
159	b		7	If costs are up charge more.
181	b		7	My home is also rented therefore to keep up our visitors & income to the island any increase in fees go tot hem.
188	b	VI:	7	we pay more in taxes than we can afford!
192	d		7	Increase cost of disposal
194	b		7	With the corona-virus pandemic I strongly recommend no increase in cost right now as families will be struggling for awhile.
196	b		7	Make sure the cost is so high that folks put trash in the woods!
203	c		7	I think this is great. It's hard to also be a business owner with the extra costs. So to find a happy medium would be great.
230	a	III:	7	hopefully you were already doing that!
274	d		7	[...] feel strongly that the expense should be on the individual that is responsible.
4	a		8	The dump is a visitor's bureau - which should encourage staff to be welcoming & friendly
5	d		8	Our model could teach & inspire others!
44	d	III.	8	We're confused by the way this questions is framed. Are we talking about a choice between fees or property taxes? Either way we are willing to contribute to the cost.
52	e	V.	8	Present practices OK.
58	a		8	II. Government should not have to do it. The people should do this on their own! [unintelligible] responsibility!
58	d		8	IV. Didn't know there is a problem.
59	g	II.3.	8	No.
61	g	IV.4.	8	This will require participation from all businesses and residents.
84	0		8	Let's look at other towns and see how they do it. Like Gordon or Minong
125	a	IV:	8	Smart choice don't require money!
152	a	IV 1:	8	This is not a professional or efficient approach! Resources already available to islands & small communities - refer to these + experts available.
7	j	VIII 1:	9	great idea!
7	k	VIII 4:	9	mandatory would be better
10	b	III 3:	9	Worry that fees may discourage low-income people.
10	e	VIII 1:	9	They might rebel & dump illegally or burn it.
10	j		9	We also strongly oppose charging for trips o the ferry (already exorbitantly high for many!) to subsidize waste management
10	k		9	We also strongly oppose ... charging campers (many may just throw trash in woods rather than pay!)
15	f	VIII 1:	9	Yet need to be careful they may just throw more garbage around
21	c		9	The more one throws out the more they should pay.
21	d		9	Encourage recycling & composting. It's not hard once your get into the groove. If someone never throw away trash on the island don't mandate they pay for it like in big cities.
25	h	II 2:	9	no
25	i	II 3:	9	no
29	b		9	IV. I think our taxes should cover costs.
29	c		9	V.1. Taxes should cover it.
29	d		9	Our taxes are high.
32	b	VIII.4.	9	But it won't be enough \$ to matter.
32	d		9	I support "taking it up a notch" but don't be too aggressive on tourists or you'll find the trash in a ditch.
34	a		9	II.2/3. Not with tax \$ with disposal fees.
34	b		9	IV. Not taxpayer \$ - from fees only.
34	c		9	VI.2. With limited cost to taxpayer.
34	d		9	VII.1. Like \$1 effect.

34	g		9	Garbage disposal is too cheap. A large bag at my home place costs \$5-\$7, appliances are \$20 and up. You must remember it costs \$\$ for the ferry, you need to compensate for that for included costs!! I pay more at home than the island, other have said the same thing. Increase your rates!
35	c	VIII.6.	9	You have your work cut out for you!
36	e		9	You can't charge campers garbage fees at the campground - otherwise they will throw their garbage in the woods. The you will have to pay an employee to pick it up and dispose of it without charge anyway. Better to charge a higher camping fee than a separate garbage fee.
37	b		9	VIII.1. Add to camp fee. ... In the campground fee add a modest sum for garbage.
42	g	III.5.	9	Or sneak into the town's garbage.
43	a	VIII.1.	9	Include in regular fee.
45	g		9	2) Please do not charge or ask for donations from island visitors for waste disposal as that will likely result in very negative response and harm the island's appeal as a place to try out. Think about including any "tax" in the MIFL basic ferry rates but posting it as a separate charge or even a "voluntary" payment is not a good idea.
48	c		9	Charge the bars and restaurants a recycling fee for all recycled items that they bring to MRF.
49	c	VIII. 4.	9	Could it be incorporate with cost of renting and the owner pass that fee along.
52	f	VI.1.	9	No included in current budget.
52	h	VIII.2.	9	Already enough.
53	c	IV.	9	Too many taxes already!
53	d	VI.1.	9	No more than now.
58	i		9	If people know they have to pay a high fee or option to take it home, they may think twice to bring less packaged items (plastic bottles, wrapping, cans, glass bottles, etc.) so taking it with them can be easier for them also.
59	h	III.	9	This is what the MRF employees do - they set the cost. It is their job to collect the proper fees!
60	a	VIII.1.	9	Should simply be in the fees.
60	b	VIII.5.	9	Too bureaucratic. Should be simply in dock lease that boat pays to town.
63	g	VIII 1:	9	build into fee
64	b		9	I would support a user fee.
64	c		9	I think the focus should be on developing or increasing user fees. The caveat to this strategy is a potential increase in dumping. This could be mitigated in the parks, especially by increasing fees to cover the costs of recycling & trash removal.
64	d		9	Given the majority of trash/recycling is likely food related, having a charge for food purchased on the island might help defray the cost of recycling/removal.
69	a	VIII 1:	9	disposal should be included in cost of park, not as an extra fee
72	c		9	There should be a fine for people stuffing big garbage in town cans.
72	d		9	day users (resident & visitors) should pay a fee (annual) or day to use the town park. Not unlike the boat storage fee.
78	a	VIII 1:	9	they will just throw it in the woods, ditches, etc
78	e		9	With the costs associated with visiting the Island currently we have come to be another Cape Cod.
82	a	VIII 1:	9	hidden charge for use
82	c	VIII 5:	9	Can there be an unimpeded rate for ferry mag card holders?
98	b	VIII 1:	9	just chg more per site
106	e		9	I would rather see increased daily user fees than increased property taxes.
107	a	VIII 1:	9	part of the camping fee
107	b	VIII 5:	9	too difficult to administer
113	c		9	Hotels, lodging adding a tax for recycling.
125	c		9	1. Certain individuals and businesses receive beneficial treatment at the dump. This increases costs for all of us!
125	d		9	2. Bump [dump] fees should pay for operation of the dump!
126	c	VIII 5:	9	Hard to enforce & would create lots of resentment, especially for owner/visitors who already pay for waste disposal.
138	a	VIII 1:	9	Will result in garbage in the woods!
138	d		9	Raise camping fee at Town Park to cover waste stream generated.
139	a	VIII:	9	Raise the camping fee at Town Park to pay for garbage and Maintenance expense - fees need to cover expenses. Charge a day use fee to help cover maintenance & garbage fees (Town Park). Islanders could get a pass for Town Park with no fee.
154	b		9	VIII 1: It should be factored into their camping fees.

154	d	9	Waste should be financed through use - which means islanders should be paying the actual cost that it takes to dispose of a bag of non recyclealbe material. if that is six dollars per gas, charge that. If the prices of a bag of garbage is the actual cost to dispose of it, then more people will likely recycle and compost more if they ave to pay more to get rid of that bag of garbage.
162	b	9	Once a year, I pay \$125 as some kind of waste fee. Why not increase this to help fund various environmental programs? Would be simple!
162	d	9	Convince someone to organize a foundation so large donations could be tax deductible.
162	e	9	Apply for a grant from Duluth Superior Area Community Foundation for seed money.
164	a	VIII.1.	Could be part of park fee.
237	b	VIII 4:	Volunteer programs that ask for money don't work.
260	c	9	if costs become too high, people will nto bring garbate/recyclables to the MRF, they'll burn them or dum them in the woods. totally defeats the purpose.
260	f	9	In general, yes, people (& Businesses) should pay the actual costs of their garbage.
262	b	9	We believe that or property taxes pay for our trash disposal in addition to the user fees at MRF. I believe the current user fees at the MRF are reasonable.
264	0	9	I checked "yes" to several items that might increase costs, so I'd be interested in knowing the costs and a cost/benefit analysis.
266	0	XI:	Save on cost to dispose of garbage.
268	c	9	I think having to pay for garbage and having recycling free is a good way to incentivize use.
276	e	VIII 5:	maybe for the people that use the parks and are here for more than a day. There should be an impact fee charged to visitors. Perhaps a wheel tax of \$.50 per car per year. Everyone would pay including residents. A resident would need only pay .50 per year per care they use to cross. Seasonal visitors would only pay yearly. Considering the # of cars crossing daily in high season this would add up. It would require cooperation of Ferry Line. Starting at a modest .50 might not upset people too much.
280	0	9	Do this and they'll just dump it in the Town's trash cans in town.
283	a	VIII.1.	If it does not incent tossing in ditch.
292	e	VIII.1.	
295	a	9	As a cabin owner I already pay a ton in taxes to the Town of La Pointe without local representation or voting rights. The idea that I could have an additional "car tax" each time I visit is a slap in the face. Tax the rentals, campground users and yachts first. Please! Leave us out of your tax planning!
296	d	III.	Businesses should pay more due to more waste; however then some people and businesses will just use trash and not recycle.
298	a	9	On having tourist/campers pay waste fees, I'm afraid that would cause some (many) to simply abandon their trash or throw it in the woods. Is it possible to set up a mechanism for the ferry line to charge a "tourist fee"? Say \$1 for everyone over 12 years of age? # of people in cars and walk-ons and bicycles?
299	c	9	What is this number? Ferry line must have it. Aren't they a public carrier? They must be able to provide hand count.
301	c	VIII.1.	Maybe increase their fees to cover expenses.
301	d	VIII.4.	They wouldn't volunteer money. Taking all the drama and emotion out of the equation, we end up with facts to look at. If a person has a position, town position, the over see-er of that position needs to work with and "manage" that person. Updating job descriptions, evaluation processing and over all maintenance isn't going to happen over might. But we all want a better solution that might include more checks and balances.
1	0	10	
4	b	10	There should be a hand washing station/drying for people to use after sorting trash.
7	b	II 2:	Are you going to ask the MRF Supervisor to do this?
7	c	II 3:	This should have been expected of MRF Supervisor!
7	e	III 1:	it would be great to see the paid workers actually working!
7	f	IV 5:	As long as they paid employees do more work than the public!
7	l	X 1:	The attitude at MRF makes me discouraged as if they really don't care whether I recycle or not.
7	m	10	You don't want to get me started . . PLEASE FIRE TED PALLAS! What the hell are we paying him \$26.22 an hour to do? It's a total joke to call him a Supervisor!!! We need to work on cleaning up the dump. It's so sad to see the amount of trash on the ground there. Not to mention the amount of eye sores with the pile of old furniture and the endless amount of broken glass. Ted has absolutely no customer service and just seems so pissed to be there. it's very unwelcoming. It there a record of sales? I've never seen one. Clean it up and hire better younger & more capable employees. For starters MRF has no customer service as all since the passing of Carey Baxter. I'm lucky if I get a grunt from Ted Pallas who has never offered help or been bothered to say hello. MRF is also an environmental concern due o all the garbage on the ground. MRF is in need of some serious organization and clean up. ... Where is that money going? and why is Ted Pallas paid so much for working two days a week? Questions for thought.
13	0	10	I suggest that the payment options be improved as far as being able to use a credit card at MRF not only for customer convience but also so that there is a precept and proof of payment for both parties. It's very strange that isn't an option.
14	a	10	
14	b	10	

24	b		10	Get rid of Town Admin !!!!
25	g	II 1:	10	Yes, make drop off easier or do single stream drop off.
25	j	III:	10	The only way would be to have personnel wight anything dropped off, solid waste, demcon, business recyclables, etc.
25	m	X:	10	Understanding what other items can be recycling and how: egg cartons, oil containers, metal items, paints, etc. 1. what can be 2. where do they go , now to drop off. So many people are sorting their recyclables there at the dump, takes time and space, creates a log jam. Folks who don't want to recycle can just throw away in compactor, system is on the honor system.
25	n		10	I'd break this down into recycling, drop off education solid waste reduction.
25	o		10	Dump is difficult to use, where things go, too congested.
27	b		10	I'd suggest starting out re-organizing the entire site and better explain the process.
27	d		10	use of clear bags
27	e		10	staff should be checking bags
27	f		10	can they weight the bags?
27	g		10	
				We do not believe waste removal and recycling should be a service provided by local government. Waste removal is best and most efficiently handled by the private sector. Independent contractors, not government programs will be the siplest and most cost effective solution for business and individual garbage and recycling service. If necessary, a municipal ordinance could be passed to forbid the accumulation of litter, garbage, waste and debris at properties and to require its removal to prevent public nuisance. For the past several years, the market for recyclables has been in upheaval. Changes instituted by the Chinese government have drastically altered how our recycling streams are handled. Any solutions to these problems are far beyond the power of the municipal government of La Pointe.
30	b		10	X.3. Not clear what to be placed where - too congested.
31	l		10	Take a look at efficiency of operations.
31	o		10	VIII.10. Over 75 years old.
37	c		10	(no glass crushing around customers). Glass crusher into exchange area exchange area back into old exchange.
40	c		10	Ship out bails - plastic bails can't lay around outside.
40	d		10	Fix things now before moving forward.
42	d	II.2.	10	How our system works-how to deal with other things - paints, metals. Aluminum barrels always full - ask folks to crush before dropping off to take up less room? Glass "barrel" is under window to throw in garbage.
42	e	II.3.	10	It seems that it hasn't been consistent on how bags are charged. Iv'e see people ahead of me or with me get charged less numbers (punch card) than I've had with the same amount.
49	b	III.	10	Make it more accountable (cash may just be going in pockets. Buy a prepaid card or credit card)
53	e	VIII.2.	10	Make it a law for offenders.
53	f	VIII.9.	10	Make the recycle center more accountable as a business!
53	g		10	The dump needs to be cleaned up! There is no excuse for the mess there now. Carey tried his best despite obvious obstacles. I am saddened that after so many years of waiting for Ted to retire, that he won't get his chance to make things better. It is time for new and energized blood to take over and create a clean, safe and economically feasible environment at the MRF.
55	g		10	3) Lease out the MRF facility to a third party (Waste Management) who would collect fees as the know the best and maybe lowest costs of disposal and recycling. The could pay the Town for the privilege of servicing our island.
58	j		10	The MRF is a total disgrace to the Town it needs to be put under the supervisor of the Town road foreman/crew and dealt with now. In the past (years ago) the road crew would at least be allow to go work at the dump when they had time.
60	d		10	Also, we are a tourist economy - the dump needs to be open on Sunday and on the day after a big holiday.
60	f		10	crushed batteries, broken glass, and mystery goo just to attempt to recycling a single cardboard box. Everywhere I look I see OSHA violations, personal safety hazards, Very dirty place.
62	b		10	We should improve the quality and cleanliness of the MRF and improve the knowledge of people who use it, as it is today when you are there you are mostly on your own.
68	d		10	Please can we have hand washing station at the MRF
69	d		10	I guess we should look into developing a landfill on the island. In spite of the meritable push back that would initiate. Not in my back yard.
69	e		10	I think the MRF [and the Work Group] is doing a great job and they are working for even better solution to help protect the Island and our plant.
71	c		10	I think self hauling is beneficial to the island.
73	a		10	I'm not sure why the island doesn't have a transfer station instead of a MRF?
99	b		10	
99	c		10	

100	c	10	i know very little about govt guidelines, however, I an opposed to moving our recycling center.
104	c	10	I think labor costs should be considered, too much time collecting/sorting stuff. Why not single stream?
108	b	10	I think the transportation of recyclables should be done by the town not to out source it at this time, fine some competent help that lives on the island not mainland.
118	0	10	I assume the expense would be prohibitive, but what is the possibility of setting up a large furnace to burn island waste.
119	c	10	Get someone to run the recycling program that is smart & clean the place up. It looks like shit
120	0	10	Make it all easier for the public. Provide large, standardized bins for homeowners. For trash & recycling either pick up & empty automatically with truck, or provide (for a fee) large bags that fit the containers.
129	0	10	Current transfer station doing a great job - workers do and work hard.
138	b	10	A good first step would be to better organize and clean up the MRF.
138	e	10	Remove the "junk" from the airport area.
143	i	10	The job of the MRF director should entail solving these problems & Ted has not proven he can (or want to) handle it. Let's be real & hire some folks.
148	0	10	The present MRF operation needs to be modernized. The facility looks awful - needs to be cleaned up.
157	c	10	Consider some sort of credit card like ferry uses.
159	a	10	We have good recycle program now. Get nicer employees at MRF. Train/require them to be pleasant and helpful. The one who seems to be in charge is the main problem. Too many unpleasant visits. Our family works hard to always comply.
168	0	10	5 men, 1 women?! Diversity + expertise = best outcome
222	b	10	Call Kerry back from the dead! Fire Ted! The recycling center is not well organized or very obvious as to where items should be place or how to identify their classification. Recycling staff are often not readily available to ask for help. Their should be better signing/description of recycle classifications.
242	c	10	We want more access to the exchange for recycling - open the big barn again - it was working well. we are willing to volunteer to work there.
250	b	10	The Town has done a good job and Ted has been on point.
259	d	10	What does increase inconvenience mean? Limit days open? Have employee "watch" what you're doing while at the MRF. So you're at MRF for linger period of time waiting?
260	d	10	The MRF hours/days need to be changed as not being open when tourist leave creates problems with disposal.
262	c	10	Comments: The cleanliness of MRF is beyond atrocious. A pig sty is more what is like and to apologize to pigs. When William worked there the space was immaculate.
272	0	10	Ted has to do more than punch tickets. I hope this comment does not fall on deaf ears. MRF needs to be cleaned up and reorganized. ... MRF needs more buildings so they can story everything inside - not piled up wherever they find room. Inside storage will help to keep things dry and better organized.
283	d	10	He also needs more employees.
284	c	10	We should make recycling bins available at cost to help with pre sorting!
287	b	10	[supportive of composting but] I am curious though that the compost should be at the MRF?
289	b	10	Ted will need more help.
296	f	10	Larry and I are very thankful for all those who work for the waste management group. They work very hard to keep Madeline island clean. There is always more that can be done and some of that burden should fall on all of us you live on Madeline and on those who come to visit
302	0	10	I am a summer resident, but I whole heartedly support the effort on Madeline Island. If the MRF work group can provide an account to which people can donate, I will gladly send \$ electronically. Thank You Terry Donohue e-mail tdonohue3@cox.net or tdonohue47@gmail.com
28	0	11	
50	d	11	I'd be happy to help think through and strategize on various economically feasible approaches and initiatives if there's an opportunity. Charlie Stringer 323-350-4885
52	n	11	As a govt professional fiscal expert I would guess that I could figure out many ways to make Madeline govt more efficient . Andrew Gantt, 1689 Hagen Road. i cam happy to volunteering my time to brainstorm efficient ways to improve the R3. PS Back in the 1990's I did my PhD research on Madeline Island's waste stream and I am committed to helping now if needed. Sonya Newenhouse
91	d	11	Thanks all If i can help please contact me - Tori Moore
259	c	11	
50	c	VIII.5. 15	Perhaps a limit of vehicles on Island, but would need public transportation, shuttle buses, uber/lift, dedicated bike paths, etc. Encourage fewer cars on the isalnd be offering a free shuttle (trolley like Ashland) running everyhalf hour out to the Town & State Park (able to hop on and off around town too) during high season. Limit # cars on island by having tourists (not owners) pay more. Work with Bayfield for a larger longer stay parking lot so visitors can leave cars in Bayfield.
123	b	15	
43	c	16	Recycling will need to be segregated into on and off island. Examples: an island compost, construction materials. Off island: autos, electronics.

52	I	X.	16	On Madeline too expensive.
55	h		16	Tourists and construction companies alike need incentives to take their trash with them when they leave (maybe higher MRF prices would do this). at this point our family takes our recyclables and trash off the island when we leave. We feel it's important to keep the island clean and beautiful. Work together
56	e		16	Keep America Beautiful clean up after yourself and don't this that someone else should do it for you!
58	e		16	VI. We are part time residents. We take all our garbage and recycling off the island to our home and dispose of it there.
58	f		16	VIII. 1,4,5. Or have them take it home and dispose of it there.
58	g		16	1) I have only used the MRF one time and didn't know I had to pay.
58	h		16	2) Knowing I have to pay (donation?), I would rather take it off the island and dispose or recycle it at home (in the Twin Cities) where I pay for that service. It is not
64	a	VIII 5:	16	hard for us to do that. Even if we have a couple families come up for the weekend, it is not a lot to take home with us.
70	e		16	I usually bring trash back to Hudson.
75	o		16	Maybe there could be incentives for tourists to take their trash and plastic bottles home with them?
138	c		16	For summer residents - we do what we can we take most back with us!
138	g		16	If items like tires are brought to the island, that person should be responsible to take them off the island.
167	o		16	Encourage visitors to take their trash back with them.
193	c	X.	16	We are summer people and we carry most of our recyclables and garbage home where we recycle.
195	b		16	off island ... I am a seasonal resident, most if not all of my waste goes home with me off island.
200	b		16	As mainly s seasonal weekender. I take back what I bring and leave no refuse or recyclables on the island!
211	a		16	We bring out waste home wen we lave after staying at our cabin. And recycle there.
227	a		16	We are on the island about 30 days a year. We take all of our garbage & recycling off the island when we leave.
282	e	VIII.1.	16	We have a home, but is not a permanent resident, yet. We carry off all garbage & recycling back to our home, sort it and clean it.
286	o		16	They be encouraged to take what they can home.
305	o		16	The is really n/a to us since we stay on the island for short period of times and bring our garbage home.
149	a		17	I take everything off the island and recycle in MN. They take everything and sort accordingly.
150	o		17	I am a landowner, no cabin. Very minimal impact, camping only.
184	o		17	I didn't answer many of the questions because I don't live on the island or have any structure (cabin).
187	b		17	I am a summer resident and take recycling very seriously. I am a single person and do not have a lot of waste - until company comes, but I make sure that they know all
210	o		17	of the recycling rules, and sometimes ask that they take their garbage home & dispose of it there.
265	o	VIII:	17	I simply own a vacant lot on the Island
267	o		17	A few responses I have made may contradict each other in the survey. I have not been on the Island in 6 yrs. do to health problems either with me or others related to
269	o		17	me. i also have been a caregiver and that at 8 yrs of age. On April 14th I will be 86! I have always enjoyed visting the island during spring, summer and fall months. I
274	b		17	I live in Oklahoma, if I moved to MI, I could answer the questions.
10	l		18	Own land
19	b	VIII:	18	Not a resident
19	c		18	I only have vacant land, no garbage/recycling issues. Where I live in the Twin cities,MN personally not used garbage collection (but paid for it) or recycling since 1977.
34	f		18	Recently they stopped charging me for the services which I deal with myself.
34	h		18	I own land on the Island but have been unable to go for stays for years. [...] I have not heard pros & cons in town meetings so [...]
38	f	II.1.	18	It would hurt local businesses & island tourism if it becomes even more expensive to visit.
44	c		18	Collect garbage fee from renters as part of rental charges.
48	e		18	A large part comes from all the rentals. A Garbage fee should be added to every rental reservations, camping etc.
			18	VIII.1. There should be no garbage disposal at parks - only recycling.
			18	also [there is no other place that] there needs to be an added fee added on to owners who rent as vacation properties, the school of the arts and etc. These draw
			18	thousands of people every year not your average tourist who comes for a day, buys a meal, souvenirs, and support local businesses. Tourists don't make a lot of trash,
			18	it is those who come for several days or weeks.
			18	I would think tourism plays an integral role in the economics of the island. Perhaps the true effect will be seen this summer. Can't see that adding more fees for
			18	parks, vehicles, etc. would help that as might discourage visitors. It's difficult to reach happy medium - bringing people over, but not a Door County atmosphere.
			18	Educate residents and visitors.
			18	Have the tourist be responsible for the cost of recycling.

59	i	V.	18	How do you make it super low impact when we have thousands of people here every year. It is not the residents that create all the garbage, yet we pay for all the guests that come to the island.
				I don't feel the financial burden of disposal should be placed on residents of Madeline Island. The more people who visit MI the more garbage there will be. It's inevitable. ... We certainly don't benefit from increased advertisement or billboards advertising Madeline Island, although I understand the need for businesses to do
61	m		18	so.
61	o		18	Perhaps a "carry in carry out message like the Boundary Waters model.
				I don't believe it is the residents that need more education on recycling. As a person with a rental property it seems most short term renters are inept when it comes to recycling. And how do we educate them? They don't understand holding tanks either!!!
67	d		18	I could have used more information about ... costs for tourist trash
70	c		18	I don't want to pay more for collection - I believe the people that come to the Island are concerned with the earth. Make it easy.
85	e		18	The costs of trash hauling should be figured into the tourists creating the trash and that goes for seasonal as well as yr round residents.
99	d		18	costs of tourists are already fixed into what they pay.
102	a		18	
143	e	VIII 5:	18	Big time
144	b		18	The Island depends on tourism to a large degree. I would avoid imposing additional costs on "tourists" to subsidize the Island's waste management issues.
				I would be concerned about annoying tourists - our guests - with small but noticeable fees. Some type of appeal to them for donations would be much better: a
162	c		18	marketing opportunity: "Keep our Island Green and Clean".
				Regarding last question - We are seasonal residents, so when we come up, it is our vacation time. We recycle a lot of our garbage, but sometimes I let some things go
163	b		18	because we're on vacation and wanting to relax a bit more.
				Difficult to answer as we only come for 1 wk twice/yr but have 2 cabins in the renal pool. I don't want my income to decline due to high costs of waste. The renters are
175	a	III:	18	not feeling the pain of the cost and they are the ones making the problem. So if I limit rentals, the town loses income. If I don't limit renters, I stand the cost of their
175	c	VIII 1:	18	<b>If tourists are charged for garbage, they will dispose of it in someones ditch or other property.</b>
183	b		18	If you charge tourists extra for throwing away trash, they will end up throwing it in the woods.
				Would love see see advertising to MI visitors on the importance of waster reduction. For example - bring own water bottle (& refill it) - leave not footprint on our
186	b		18	Island Wilderness.
191	b		18	Persons should pay for their personal disposal items including tourists. I do not prefer to pay for other person's garbage disposal or recycling.
205	b	VI:	18	As a summer resident I am willing to pay for my own but not to invest heavily for the year long use of ?????
209	b	VIII 4:	18	tourists pay extra
211	b		18	We do rent our home and am interested in ways to encourage renters to reduce and recycle - or at least help pay for the services. Not sue how that would look.
215	b		18	Could a fee for town park use defray some recycling costs?
				Tourism is the life blood of the island, recycling should be encouraged, but adding costs could discourage - education might be better - every islander mus respect their
223	0		18	neighbor
226	0	III. and X.	18	I have renter and they don't always comply. ... I an a rental owner - not always on the island.
233	b		18	Vehicle use fee - only for visitors, not island residents and taxpayers.
234	b		18	Having tourists pay their share, as the dock, would help defray costs.
235	b		18	Interested in how much it would cost per tourist vehicle to help defray the trash cost?
237	d		18	<b>People who live on the island and non[resident property owners should pay a different fee for trash disposal than visitors.</b>
				Depends on who is considered a visitor? Are those of us with property on the island considered visitors? How would this be charged? Maybe people who have ferry
239	0	VIII 5:	18	mag cards don't get assessed a fee (cuz I'm guessing most homeowners have a ferry card)
243	b		18	I think tourists who stay more than 24 hrs should be charted for their garbage/recycle stuff at each camp site at Town Park & State Park, perhaps hotels can add the
				If you start charging tourists for trash disposal, the fallout will be more trash thrown out on the side of the road and in the woods. This is already occurring on private
250	a		18	properties and will escalate.
251	0	VIII -1	18	Campsite fee includes 1 or 2 bags of garbage
				There should be a user fee for everyone who comes to the island. I yearly charge per car/truck that crosses, say \$1.00 that everyone would pay an receive sticker to
271	0		18	apply to car, locals, businesses and tourists.
				It is my experience that year-round and summer residents do their part to reuse, conserve and recycle as much as possible. My guess would be that tourists make up a
281	0		18	disproportionate amount of waste. The Island needs tourism to support business/economy but there should be more expected of tourists rather than residents.
290	b		18	<b>Totally in favor of tourists paying more into waste.</b>
292	j		18	My question: how to keep it simple for a visitor coming up for the first time.

301	a	II.	18	I see summer people throwing their garbage away in front of Dockside in our public garbage cans.
301	b	IV.	18	We have a good system. Tourists and summer people need to follow it.
29	f		20	I recycle and compost in St. Paul, MN.
38	d	VIII.10.	20	Willing to help in some way.
38	g		20	I must say that as we looked for Bruzzo a couple of summers ago, I couldn't believe the amount of junk on the island. Frankly I was rather appalled. Hopefully something can be done to assist those people in removing some of the stuff.
41	0		20	We are only seasonal visitors, we currently bring our recycle/waste home with us to our primary residence as much as possible. We do plan/intend on permanent island residence in the future. Thanks.
42	j	VI.1.	20	Here on the island?
52	m		20	Our permanent home is in Virginia. Our property tax rates in Virginia are one thenth those on Madeline. Also on an apt. building I own in DC and a condo I own in Norfolk VA. They include recycling waste disposal, etc. Madeline fees are so high, we brought an old TB and vacuum cleaner all the way back to VA for recycling.
55	j		20	RIP Carey Baxter.
68	c		20	keep up on hauling off island.
78	d		20	It seems the normal M.O. for the Island is to throw any & all issues.
79	0		20	have you factored in business waste/recycling - do we have any idea of the percentage of business vs personal waste, and how they might pay more accordingly?
90	0		20	I also find the several "trash" houses & properties on the Island an eyesore and very bad for image of island, example, property east of MRF, property south of golf course parking lot, etc.
93	0		20	My habit is to carry in and carry out everything i use on the island. Other than pump out, which i can't do, but pay for both for the service itself as well as the island disposal fee. i generate as little waste as possible, then dispose if it at home in Minneapolis. This same is true of recycling, and my intent is to keep doing so. Based on the this my feeling is that i should leave to others that use the described services how they want to handle things.
162	a		20	(From Char Kerelko who owns William Hagen's house): I'm not sure all what William does. I know he is concerned generally about the environment. Char Kerelko
176	0		20	Concerning new approaches to waste management I would suggest a volunteer group to do the research and make suggestions.
192	e		20	Put a summer resident on the MRF Work group
206	c		20	It would be nice if there was also an ordinance about junk laying in yards. it would of course need to be reinforced.
207	b		20	once tabulated - workshop members - make individual recommendations based on response & information gathered by this process. use those to build report to town.
249	c		20	Would love to see abandoned and junk just sitting and rusting on properties be cleaned up and removed to make the island more beautiful than it already it.
252	b		20	I cant believe the number of trailer on land with outdoor toilets? No ordinance?
274	c		20	[...] But is very sad to me to drive to property and see the junk in some yards along the way. [...] unsure why people have been allowed to trash our beautiful island.
5	c		21	Thank you for giving attention to this. Important conversation & action for the whole world - of special significance to our limited island.
10	h		21	Thank you for working on this important issue.
14	c		21	Thank you for letting us get our 2 cents in.
17	0		21	Please keep public appraised of ideas that are options to consider.
27	c		21	Thanks for asking.
30	a		21	Thank you to the Materials Recovery Facility work group. We value the community involvement and effort put in by the group members. ... Thank you to all
32	c		21	concerned for your time and hard work on this important issue. Thank you for seeking and heeding public input.
33	a		21	Good luck - I think it is a worthy effort. I expect there is some tension on this on the Island. ... Thanks!
39	a		21	As a summer only cabin owners and property taxpayer year-round, and a non-allowed voter, I am deeply appreciative of this "ask" for response questionnaire. This is a balancing act of year-round, summer, tourists, visitors, etc.! ... Thank you and we hope that the coronavirus will be stopped in its tracks and that many are safe and OK.
44	f		21	Plus, we hope that we can be able to visit our cabin this summer and not be "travel restricted" for the safety of all.
45	f		21	Good questions!
50	e		21	Good to know you're working on it. Thank you!
			21	1) Thank you from a summer resident for requesting input and ideas.
			21	Thank you for your leadership on these important issues.

57	a	21	Thanks for the opportunity to weigh in!
58	b	21	Thank you for looking into this for those who live on the island and other visitors.
61	p	21	Thanks for your service.
62	c	21	Thank you for all of your efforts MRF work group, it is sincerely appreciated.
73	b	21	I think [the MRF] and the Work Group is doing a great job and they are working for even better solution to help protect the Island and our plant.
78	h	21	Thank you for doing this, much appreciated. Don't give up the fight.
81	b	21	I recognize that recycling is a national problem but applaud your group for working on this issue.
91	a	21	Thank you so much for asking out opinions.
92	b	21	Thank you for the questionnaire.
100	a	21	A very thorough survey.
101	0	21	Good survey, thank you
111	0	21	I appreciate this process to help all of understand the problem of wast disposal on an island. Thank you
112	0	21	Thanks for doing this work. Thanks for the survey also
128	0	21	Thanks for your efforts regarding these matters.
130	b	21	Thank You!
137	0	21	This is a great initiative. Thank you for asking our input.
149	c	21	Good Work
153	a	21	I appreciate the Town of La Pointe asking residents about the MRF and exploring new ideas and taking risks, in order to reduce waste and increase recycling.
155	a	21	Thank you for the opportunity to provide feedback!
164	b	21	Keep up the good work!
169	0	21	I appreciate the work the town is doing on this challenging issue.
174	b	21	Thanks for the survey. I think this si great, I'm glad you are working on it.
177	b	21	Thank you for asking us these questions.
179	0	21	This survey is a great starting point. Thank you for including all property owners in your survey.
182	d	21	Thank You!
186	c	21	Thank you for raising the questions.
187	c	21	I like where you're going with this.
204	b	21	Good Survey!
205	c	21	Thank You
219	b	21	I support your cause. Good Luck
228	0	21	Thank you! This is an important issue for the Island!
244	b	21	Thank you for doing this work!
249	b	21	Thank you for your efforts!
256	0	21	Keep up the good work, we only have one chance to do it right.
263	b	21	Thank you for doing this.
268	d	21	Thank you for thoughtfully trying to improve our waste management practices.
273	b	21	This survey is a good idea!
283	c	21	Thank you to all the members of the Work Group!
290	d	21	Thank you!
296	e	21	Good questions.
298	b	21	Thanks for your work on this!
12	0	22	These answers are with no benefit of a cost/benefit analysis.
18	0	22	This is the most biased "survey" I have seen in years. The town should demand our money back! Literally throwing money away. The survey was very long and poorly worded. It was so confusing, we did [not] feel our answers would be accurately conveyed. It felt like the survey was cobbled together by several people who had differing and even antagonistic view of the issue.
30	c	22	very poorly worded questions. You should have asked general questions and depending upon the answer a series of follow-up questions. Some should have been yes or non responses instead of not at all important through extremely important (Section I)... Sad to see tax money wasted on such a poorly worded survey. Who is tabulating the survey results? Well negative results be "thrown out" in order to arrive at the response the town is "looking for"?
36	a	22	

42	s		22	Instead of asking how we feel, why not ask if we already do these or not? If not, why? Maybe ask more point blank questions. What are you trying to find out - feelings? Would you be in favor of single stream and explain what this is, if it makes the dump more efficient, reduces cost to the town?
59	p		22	The Town paid \$1,700 for this survey - Really? Most were leading questions - seems like this committee wants things answered a certain way. Topics did not match answers.
66	i		22	Stop listening to "experts" from the mainland. we had already solved most waste reduction/recycling problems before the town administrator got a bee in her bonnet
85	a	IX:	22	why does this matter to the town?
85	d		22	How were these questions/priorities established? What the "town" surveyed ??
284	b		22	We think you should listen to the "man" who runs the Recycling Center. He knows first hand. Try that! "He is the expert"
293	d		22	not a very well constructed survey.
7	d	III:	24	What kind of inconvenience? to the public or MRF staff
8	b	VI 2 & 3:	24	need more info
8	c	VII 1:	24	need more info
8	d	VIII 1:	24	too many questions on how this would work
8	e	VIII 5:	24	also, too many questions
9	b	VI 2 & 3:	24	depends on costs
9	c	VII 1:	24	maybe - need more info.
9	d	VIII 1:	24	not sure how this would work?
9	f		24	Vehicle fee - too many factors for a yes or no question. Who pays - every vehicle - every trip? Not really fair for residents. Who collects the fee and how is it used?
10	c	V:	24	Please provide more information about what "super low impact" means, perhaps with an article in the Gazette or public meeting this summer.
10	f	VIII 2:	24	Not sure what this means?
25	k	IV 1:	24	other ways
25	l	V:	24	I don't know what this means, super low impact, so hard to have an opinion.
27	a	X:	24	V: What does this mean?
29	a		24	III. Not clear about "handling" costs. Would this be a cost to compost?
31	a		24	I.1. If it makes sense
31	b		24	I.3. Not mine.
31	c		24	I.4. Cost?
31	e		24	II.1. What aspects?
31	f		24	II.2/3. Cost? Plan?
31	g		24	III. "Waste disposal" - what kind? Explain? Other options?
31	h		24	V. 1-tourist 1- resident.
31	i		24	VI.1. "landfill" - solid waste?
31	m		24	Two separate issues? Recycling and solid waste.
35	a	VI.1/2.	24	Vague question.
36	b		24	VII.1. mean that a consumer brings their own shopping bag to a store or will the MRF reduce dumping fees for businesses that supply their own garbage bag?
36	c		24	VII(3) should have asked how much you recycle everything, nothing, or somewhere in between?
36	d		24	IV - what are the new approaches? You should have listed the approaches that could be utilized at the MRF. You should proof read these questions better.
38	a	VIII.2.	24	Not sure what this means.
42	f	III.	24	What inconvenience?
42	i	V.	24	Super low impact - what does this mean?
42	l	VI.4.	24	It's the how question.
42	n	VIII.4.	24	How?
42	o	VIII.6.	24	Sponsored by whom?
42	p	VIII.8.	24	Will be a cost, not revenue?
42	q	VIII.10.	24	Volunteering to who?
42	r	X.	24	Other options: unclear as to what is accepted; unclear as to where to put items.

44	e	VI.1.	24	What does that mean? "Super low impact" means different things.
45	a	V.	24	
45	c	VIII.3.	24	No opinion and not well informed.
52	i	VIII.3.	24	Not sure what this means.
52	j	VIII.6.	24	what does participate mean?
52	k	VIII.9.	24	Include in budget by greater efficiency.
53	a	II.3.	24	What does this (progressive) mean in context?
54	c	II.3.	24	Depends.
54	d	IV.	24	Depends.
54	e	V.	24	What does this even mean?
54	f	VI.1.	24	Depends on what it is.
54	g	VII.	24	N/A.
54	h	VIII.	24	I would like information on this - communicate with the public!
55	b		24	VI.1. Unsure of question.
55	c		24	VI.3. Without astronomical cost.
55	d		24	VII.1. What does this mean?
55	e		24	VII.4. Again without astronomical cost.
55	f		24	VIII. 2. Not sure - would depend on how much.
58	c		24	III. I think this word (inconvenience) should be "convenience and handling costs" (it may be inconvenient for the town who has to deal with it).
59	f	II.2.	24	No. How does it question fit any of the answer?
61	i	VI.2.	24	Depends on the policy.
61	j	VII.1.	24	Who pays for that?
63	a	I 3:	24	has it been weighted
63	c	II:	24	cost?
63	d	III:	24	fist better operations
63	e	V:	24	what does this mean?
63	f	VI 1:	24	disposal of what?
66	a	VI:	24	What does this mean?
66	c	VIII:	24	explain!
66	g	VIII 10:	24	explain
67	o	III:	24	Too vague, what is meant by increased inconvenience? less hours? less employees? longer lines?
67	a	IV:	24	Don't understand new approaches, do you mean transfer station vs recycling center?
67	b	V:	24	What is super low impact?
67	e		24	The questions I didn't answer were too vague for me to give a reasonable answer.
78	b	VIII 3:	24	very complicated issue
98	a	III:	24	If we're paying per bag I don't get the problem
104	a	I 4:	24	at what cost?
106	b	VI 1:	24	such as what?
125	b	VIII 3:	24	Language is too loose
141	a	VI 1:	24	alternative to what?
141	b	VIII 2:	24	? I don't understand the implication
152	b	VI 1:	24	Need more information, don't know
157	a	VI.1.	24	Define please!
160	b	VIII.1.	24	How?
163	a	V.	24	Super' - this word makes me reconsider.
164	c	8	24	needs more explanation.
175	b	VI 1:	24	Not sure what this means.
212	a	III:	24	confusing question

214	0	VIII 1,4&5:	24	could be offered together as a choice of one
218	a	VIII 2:	24	this questions is unclear
237	a	V:	24	This question needs more explanation. What do you mean by "low impact environmentally?" How does our current system rate for impact on the environment?
260	a		24	III: See XI
261	a	VIII 6:	24	? Participate how ?
261	c	VIII 10:	24	??
282	b	4	24	With educating what.
282	d	IV.	24	Depends on "new" approach.
284	a	VIII. 4-11.	24	Not sure how that would work. I need more details.
292	b	II.	24	. "Progressive": what does this mean?
292	c	VI.	24	I need to see policy.
292	f	VIII. 10.	24	I am not sure what this means.
293	c	III.	24	I don't understand the question.
300	0		24	See Jaime Anderson comments page.
