Subject: Fire chiefs report june

We now have thoroughly gone through all of apparatus and feel our replacement fleet ready to serve the community better than ever. We have loaded both our pumper trucks with various diameter hose lines and have exactly what we are bringing ready to deploy in any situation.

June's training was two fold

We staged a water shuttle exercise at the sanitary district holding ponds. While we went through close to 15000 gallons of water we were helping clean off the covers on the holding ponds. This water shuttle went well and exercised the majority of our equipment and personnel.

Our regular scheduled maintenance on equipment has been completed for the most part and as this has issues with our temporary fire halls we have been diligent in keeping our normal maintenance schedules.

We have removed all equipment from the polebarn/hanger generously leased to the town during the fire hall ordeal.

Be safe
