Subject: Fire chief's report july 2020

July training involved removing all of our equipment from a graciously donated space. We removed and took inventory of all the equipment stored at a polebarn by the airport. Most of what was in storage was donated equipment that if not put into service will be donated to other departments. We also stored the chief's truck and all terrain rescue vehicle and trailer. This equipment will have to remain outside until space becomes available or the emergency services building is completed.

I have been given regular updates from the construction manager at the new fire hall being constructed. I am pleased with the progress and the communication of the process. Its been a challenge shuffling equipment around and we are all anticipating the final move into our new hall.

That is all
Be safe Chief Reichkitzer
