**Subject:** Fire chief report September 2020

We are addressing a communication issue of lack of radios for members requesting to carry a radio. We have 3 years in the running applied for grants with no luck. We have now figured out how to purchase the radios we need with the budget we have. Next year we need to install mobile radios in some of the apparatus that don't already have them.

September training was ladders and ladder safety. We trained at the town and airports buildings with different teams and rotations.

Going through the budget for us has been a longer and more tedious process for the fire department this year considering the circumstances and new fire hall.

I have met with the project management with both Wendel and Berghammer construction getting updates and answering any guesting they have of me.. i am very happy with the progress and quality of the construction. Anticipation of moving equipment into the emergency services building is high.

We welcome Tyler Andreas back as a training officer as he is very passionate about training.

Be safe  
Chief Reichkitzer
