Madeline Island Ambulance Service

Monthly report June 2021

Well, it is the busy season. In May and June, we have had twelve calls. We are prepared for a very busy summer. We have changed over to the larger box ambulance for the summer. It is more spacious and now that the roads are dry works well for a busy call schedule.

We have had our regular monthly meeting where we go over runs. We also invited Riley Kaiser who passed their National Registry Exam and has applied for his license. The other two students are waiting to finish up the exam process. We will take a break on training meetings until October.

The building is coming along. We need to go over the budget and the demands that the fire department is asking for before we complete some of these purchases. The Wilderness Preserve donated \$5,000.00 to the landscaping hoping that we would do some natural plantings. The town Foreman would like to keep the maintenance down, so I selected a group of shrubs that are native Wisconsin Plants the accent the building. I also purchased from Penny's Garden Center plants to enhance the flagpole. Arnie's crew has finished the seeding and is working on the gravel parking lot for the fire department. The town crew has done a nice job with the trimming, putting down filter cloth and gravel mulch. Please send us some rain.

I have been trying to hold regular meetings about building issues with the fire department and the police department. Over the last month the fire department has not attended.

Sarah has already begun the process to recruit new students for fall EMT classes. We have three people on indefinite leave and one person that is leaving the service. They have already stepped up and joined the service and done the work to do so. We are grateful for their contribution and understand that life takes us through many turns. It does leave us a bit on the short side but Sarah and I and making sure that all shifts are covered.

Thank you,

Respectfully Submitted,

Cynthia Dalzell
