**Re: Monthly report for October 2023**

During the month of October our airport was issue free with the exception of the following:

An airport user with a history of generosity has become disgruntled with the town. This individual changed the internet network and password on his provided router causing the weather computer to default. I went to Ashland and purchased a router and set it up which is now town owed. Time was spent with tech support to get the weather computer up and running. Pilots use the weather computer and the internet for flight planning so they are key safety infrastructure. I removed the old router from the locked utility room to present to its owner and it was found in the garbage with the antennas broken off. On a good note the BOA contractor put fresh markings down mid October and the resurfacing project is complete with praise from many airport users.

Attached are logs / checklists

Thanks !
